E-mail Address

Iowa RSA No. 2 Limited Partnership d/b/a Lyrix Wireless - robertg@I35-swt.com
Kurtis & Associates, P.C. - mkurtis@kurtispc.com

Section 2**Local Area 911 Implementation**

List all individual local areas covered by this report (e.g., Lee County, Virginia):

Worth County, Missouri (FIPS Code 29227)
Putnam County, Missouri (FIPS Code 29171)

For each area listed above, identify the emergency response point to which calls are now being routed.

Calls to 911 that are captured by Iowa RSA No. 2 Limited Partnership d/b/a Lyrix Wireless' ("Iowa 2") cell sites are routed, through a Qwest selective router to the appropriate PSAP as determined by the State of Iowa 911 Board, Iowa Emergency Management Division. Intrado completed the routing to specific county PSAPs for Iowa 2 on September 13, 2002 by implementing a CellTrace Plus procedure. This procedure uses Intrado's Service Central Point (SCP) to deliver the caller's cellular phone number and the cell site and sector number to the appropriate PSAP. Prior to that date, and with the acknowledgment of the State of Iowa 911 Board, all basic 911 calls captured by Iowa 2, were routed directly to the Iowa State Patrol, Atlantic PSAP. Iowa 2 provides CMRS wireless service in the Iowa 2-Union (Station KNKN492) (CMA413B), but for the reasons listed below, is filing this instant report.

Worth County, Missouri -

No PSAP exists in Worth County. Instead, the Missouri 911 Administrative Office designated the Gentry County Emergency Dispatch, the PSAP for Gentry County, as the appropriate PSAP to receive wireless basic 911 calls made in Worth County, Missouri. Worth County lies in the state of Missouri, beyond Iowa 2's licensed service area, and Iowa 2 does not have any cellular towers or cell sites located in the county itself. However, because of the limited coverage available from the licensed carriers within that market, a minimal amount of mobile capture within Worth County occurs as a result of a useable level of signal extending into that county from Iowa 2's New Mt. Ayr tower in Ringgold County, Iowa (which is to the northeast of Worth County). The mobile calls captured on the Iowa 2 Mt. Ayr tower are routed to the Ringgold County Sheriff's Office, the PSAP for Ringgold County, Iowa as coordinated through Intrado and Qwest's selective router. The Missouri 911 Administrative Office and the Ringgold County, Iowa PSAP are aware of this situation. With the permission of the Missouri 911 Administrative Office, the Ringgold County PSAP has noted that, rather than forwarding calls to the Gentry County PSAP for eventual routing back to the Worth County Sheriff's Office, the Ringgold County PSAP will accept all basic 911 calls for the Mt. Ayr tower and coordinate the dispatch of the appropriate emergency personnel in Missouri by either forwarding the calls directly to the Worth County Sheriff's Office, or communicating with the appropriate local emergency authority in Worth County on behalf of the callers.

Putnam County, Missouri -

The Missouri 911 Administrative Office has designated the Putnam County Sheriff's Office as the appropriate PSAP to receive wireless basic 911 calls made in Putnam County, Missouri, until such a time as the Putnam County 911 is ready to accept wireless basic 911 calls. Putnam County lies in the state of Missouri, beyond Iowa 2's licensed service area, and Iowa 2 does not have any cellular towers or cell sites located in the county itself. However, because of the limited coverage available from the licensed carriers within that market, a minimal amount of mobile capture within Putnam County occurs as a result of a useable level of signal extending into that county from Iowa 2's New Corydon tower in Wayne County, Iowa (which is to the northwest of Putnam County). The mobile calls captured on the Iowa 2 New Corydon tower are routed to the Wayne County Sheriff's Office, the PSAP for Wayne County, Iowa, as coordinated through Intrado and Qwest's selective router. The Missouri 911 Administrative Office and the Wayne County, Iowa PSAP are aware of this situation. The Wayne County PSAP has noted that it will accept all 911 calls for the New Corydon tower and coordinate the dispatch of the appropriate emergency personnel by forwarding the calls to the Putnam County Sheriff's Office, or communicate with the appropriate local emergency authority in Putnam County on behalf of the callers. GeoComm, the consultant recognized by the Missouri 911 Administrative Office for 911 implementation in Putnam County, Missouri, has noted that it will inform the Wayne County PSAP when basic 911 calls should be routed to the Putnam County 911 rather than to the current approved location, the Putnam County Sheriff's Office.

Section 3**Certification - To be signed by an authorized representative of the reporting entity**

I certify that I am an authorized representative of the above-named reporting entity, that I have examined the foregoing report and to the best of my knowledge, information and belief, all statements of fact contained in this form are true and that the reporting entity has completed the steps necessary to properly route 911 emergency calls in the localities covered by the report as of September 11, 2002.
